the new edition of regina s axelrod and stacy d vandeveer s award winning volume the global environment institutions law and policy reflects the latest events in global environmental politics and sustainable development while providing balanced coverage of the key institutions issues laws and policies the volume has been reorganized to better highlight global environmental institutions major state and non state actors and includes an expanded set of cases such as climate change biodiversity hazardous chemicals ozone layer depletion nuclear energy and resource consumption based on reviewer feedback the new edition broadens coverage of the growing global environmental agenda and explores the relationships between states ngos and international organizations

globalization is often discussed in terms of its ecological ramifications yet while ecological imbalance is today one of the greatest threats to mankind globalization is also a reality that is here to stay the volume therefore seeks to address how globalizing and environmental interests can be reconciled the essays in this volume state that globalization can work both in favour of and against the environment the major issues discussed in this topical volume are how globalization can be used to promote environmental reforms the role of individuals private organizations and governments in keeping environmental degradation in check and in promoting environmental reform globalization and ecological inequality women the

environment and globalization changing nature of environmental movements overpopulation and the ecology the relation between the ecology and the economy and the effects of global climate changes

all serious environmental threats are now international in scope and more than one thousand international environmental agreements already exist yet the prospects for international cooperation leading to the management of impacts on the planet remain grim the global environment meets the need for an authoritative assessment of the state of international environmental institutions laws and policies at the end of the 20th century the book examines disagreements over the meaning of sustainable development problems inherent in implementing environmental policies and the conflict over the exclusion of developing countries from the kyoto protocol it discusses the profound trade offs that may be required the role of international financial interests in promoting incompatible forms of development and analyses international environmental institutions law and policy and sustainable development

the ffim japan international symposium energy and environment global warming was held in the keidanren guesthouse at the foot of mt fuji from october 21 to 24 1990 the symposium was conducted in the context of ffim japan s longstanding commitment to good corporate citizenship on this beautiful planet with its inter dependent waters lands and atmosphere we consider that the problems relating to the global environment are the most serious that the human race will face in the near future the symposium provided an opportunity for forty scientists and researchers from a wide variety of international backgrounds to address matters relating to the global environment in an international forum eighteen papers were presented followed by panel and group discussions on which the concluding remarks and recommendations are based we chose three types of papers to target different aspects of the condition of the global environment the natural science component the socio economic component and the energy component which links these two on the first day the symposium began with a plenary speech by dr j kondo followed by three keynote speeches each with a particular focus the following day six speakers offered papers relating to the previous day s keynote speeches

the sixth global environment outlook was launched in 2019 at the fourth un environment assembly it highlighted the ongoing damage to life and health from pollution and land degradation and warned that zoonosis was already accounting for more than 60 of human infectious diseases since then the spread of covid 19 has demonstrated the enormous challenges a global pandemic can cause for health care systems and the economy as well as revealing potential environmental benefits of an altered lifestyle this technical summary synthesizes the science and data in the geo 6 report to make it accessible to a broad audience of policymakers students and scientists it demonstrates that more urgent and sustained action is required to address the degradation caused by our energy food and waste systems and identifies a variety of transformational pathways for those seeking far reaching policies for environmental and economic recovery also available as open access on cambridge core

politically the world is composed of states environmentally the world is made up of ecosystems this disconnection between ecological and political systems makes addressing environmental issues at the global level both more difficult and more necessary in this entry level textbook elizabeth desombre examines how we should set about addressing the problems that face the environment internationally the field of international environmental politics draws on a variety of academic traditions it uses international relations theory to look at the concerns and actions of states but it also uses a variety of new perspectives to explain issues that are unique to the study of the environment desombre explores four important approaches to the field international environmental cooperation the relationship between the environment and security the issues of science uncertainty and risk and the role of non state actors she examines these approaches through case studies of specific

problems facing the global environment looking at ozone depletion and global climate change the politics of whaling the protection of amazonian biodiversity and acid rain in europe and north america to a large extent all environmental politics are global the author argues that understanding what has led to successful protection of the global environment can give great insight into international relations theory more broadly

politically the world is composed of states environmentally the world is made up of ecosystems this disconnection between ecological and political systems makes addressing environmental issues at the global level both more difficult and more necessary this volume examines how we should set about addressing the problems that face the environment internationally the field of international environmental politics draws on a variety of academic traditions it uses international relations theory to look at the concerns and actions of states but it also uses variety of new perspectives to explain issues that are unique to the study of the environment elizabeth desombre explores four important approaches to the field international environmental cooperation the relationship between the environment and security the issues of science uncertainty and risk and the role of non state actors she explores these approaches with the help of case studies on specific problems facing the global environment focusing in particular on ozone depletion and global climate change the politics of whaling the protection of amazonian biodiversity and acid rain in europe and north america

the fourth report in the global environment outlook geo series from the united nations environment program unep provides a comprehensive scientifically credible policy relevant and up to date assessment of and outlook for the state of the global environment geo 4 is published 20 years after the world commission on sustainable developments brundtland report of 1987 environment for development is the geo 4 underlying theme and the report pays special attention to the role and impact of the environment on human well being as well as to the use of environmental valuation as a tool for decision making geo 4 s specialized report the summary for decision makers is an essential guide for policy makers both publications are excellent tools for teaching and research and relevant in the field of international environmental governance as they highlight policy opportunities for a more sustainable approach to economic growth and development publisher s description

the fourth report in the global environment outlook series provides a comprehensive scientifically credible policy relevant and up to date assessment of and outlook for the state of the global environment environment for development is the geo 4 underlying theme and the report pays special attention to the role and impact of the environment on human well being as well as to the use of environmental valuation as a tool for decision making geo 4 s 2007 publication date marks the half way point for the millennium development goals the environment as well as being the subject of mdg 7 is also a thread that runs through all the goals includes errata

human activity is changing the global environment on a scale unlike that of any other era environmental deterioration is now a global issue ecologically politically and economically that requires global solutions yet there is considerable disagreement over what kinds of strategies we should adopt in order to halt and reverse damage to the global ecosystem what kinds of international institutions are best suited to dealing with global environmental problems why are women and indigenous peoples still marginalized in global environmental politics what are the consequences of the global ecological crisis for economic and security policies the global politics of the environment makes sense of the often seemingly irreconcilable answers to these questions it focuses throughout on the tensions between mainstream strategies which seek to build support for reforms through existing institutions and radical critiques which argue that environmental degradation is a symptom of a dysfunctional world order that must itself be transformed if we are to meet the challenge of saving the planet

a timely collection of essays that analyse key issues institutions laws and policies for the protection of the global environment the new edition of this popular text provides crucial historical background on the development of global environmental organisations and treaties engaging discussions of current and critical global environmental agreements and insights into national and international implementation of sustainable development principles drawing together a distinguished list of international contributors the book includes six brand new chapters on such important topics as regime theory climate change hazardous chemical controls perspectives of the developing world and the european union s and united states international environmental policies all other chapters have been thoroughly revised and updated the book includes a useful chronology of global environmental policy and a list of acronyms to help students in critical reading review and study

the world bank group was a principal founding partner of the global environment facility gef in its pilot phase in 1991 and of the restructured gef in 1994 the bank plays three different roles in the gef a as trustee of the gef and related trust funds b as implementing agency including the implementation of private sector gef projects by the international finance corporation ifc and c as the host organization of the functionally independent gef secretariat focusing primarily on the role of the bank as an implementing agency this review documents how the partnership that the gef and the world bank group established in the early 1990s has evolved over time offers explanations for observed changes and draws a number of lessons the review addresses the following issues the mutual relevance of the world bank group and the gef inter organizational coordination along the world bank group gef project cycle the introduction of the gef s resource allocation systems in 2006 and 2010 the evolution and effectiveness of the bank group s gef portfolio catalytic approaches in the bank group gef partnership co financing blending and mainstreaming the world bank s corporate activities as a gef implementing agency the principal purposes of this review are a to help improve the relevance and effectiveness of the bank group s partnership with the gef and b to draw lessons for the bank group s partnership with the gef and other large global partnership programs

gary bryner s brief readable capstone book features a forward by mark a boyer outlines the major environmental challenges facing the world today applies international relations theory to these challenges covers such key topics as development sustainability and market capitalism offers a social justice perspective to environmental problems and solutions borne of an amalgam of social science fieldwork and a passionate commitment to justice this book brings debates about climate change to a new level compelling readers and researchers to rethink the reasons for reversing global environmental trends the book lays out three inspirations for improving environmental prospects effective markets sustainable development and environmental justice for the most vulnerable it also projects three possible scenarios flowing from the success or failure of these inspirations one bleak one breakthrough and one of status quo gary bryner is not sanguine about humanity s ability to make the right choices but this does not deter him from asking us to think beyond our own generation and our own species in urging environmental action now

this volume concerns itself with the ethical principles and concepts relating to the environment nature resources and the planet this is placed in the context of ethical theory and consideration is given to the way these values have transformed received ethical traditions issues include the intrinsic value of nonhuman species obligations to future generations and the aesthetic needs of humanity both the universal responsibilities and their application are investigated the international responsibilities to the planet are seen in the context of some of the most alarming future scenarios limited access to water the changing global climate population explosion the destruction of ecosystems and even the extinction of humanity
